Unsere Styrol-Profile sind aus Polymer hergestellt: ASA (Acrylonitril - Styrol - Acrylester). Die Platten aus Styrol, PVC, Polyester und Lexan. Unsere Profile sind besonders stark, haben eine hohe Elastizitätsgrenze und sind gut zu verkleben. Unsere Kunststoffprofile und -platten können einfach mit dem Hartplastik-PVC-Klebstoff oder mit einem Zwei-Komponenten-Klebstoff verklebt werden. Es ist möglich, Styren auf Styren mit einem Lösungsmittel zu Kleben. Auf dieser Seite geben wir Ihnen Kleber Beratung.

Our Styrene profiles are produced from the polymer ASA (Acrylonitrile - Styrene - Acrylester). The sheets are made of Styrene, PVC, Polyester and Lexan. The profiles are tough, they have a high yield strength and are easy to glue. Our synthetic profiles and plates can simply be glued by using hard plastic glue or with two component glue. It is possible to glue styrene on to styrene by using a solvent. On this page we give you glue advice.

Onze Styreen profielen zijn vervaardigd van het polymeer: ASA (Acrylonitrile - Styreen - Acrylester). De platen van Styreen, PVC, Polyester en Lexan. Onze profielen zijn bijzonder sterk, hebben een hoge elasticiteits grens en zijn goed te verlijmen. Onze kunststof profielen en platen kunnen eenvoudig worden verlijmd met hardplastiek pvc-lijm of 2-componentenlijm. Het is mogelijk om styreen te lijmen op styreen met een oplosmiddel. Op deze pagina geven wij u lijmadvis.

Nos profilés styrene sont réalisés en polymère ASA (acrylonitrile styrene acrylate). Les panneaux sont élaborés en styrene, PVC, polyester et Lexan. Nos profilés sont très résistants, offrent une grande limite d'élasticité et sont faciles à coller. Nos profilés et panneaux en plastique sont faciles à coller avec une colle pour PVC rigide ou une colle à deux composants. Il est également possible de coller du styrene sur du styrene en utilisant une colle à base de solvant. Sur cette page, nous vous donnons des conseils de colle.
